### DETAILED ACTION

1. This is a notice of allowance in response to the applicant's communication filed on June 12, 2008.

### Reason for allowance

2. After consideration of the applicant's argument and amendments filed on Jun 12, 2008 in response to the Office Action mailed on April 15, 2008, and through examination of claims 1, 3, 6, 8, 12, 14, and 15 further search and consideration the claims have been found in condition for allowance over prior arts of record.

3. The following is an examiner's statement of reasons for allowance:

Claim 1 includes the following features of a computer implemented method which are not taught or further suggested and would not have been obvious over prior arts of record and these claimed features are:

**determining and storing** in a network accessible location a **route** comprising an **end to end network transmission path** passing through a **plurality of intermediary nodes** that spans a **plurality of security domains**, the route is taken by a **content request message** to be transmitted from a content requester in the **federated environment** to a content provider in the **federated environment**;

determining a **plurality of portions of the content request message** that are **security-sensitive** using a **context to consult stored policy** that identifies the security-sensitive portions wherein the **context** comprises an **identification of the content requester**, an **identification of**

**the content provider, and a message type identifying the content request message; determining rights of each of the intermediary nodes to access each of the determined security-sensitive portions of the content request message by consulting stored policy;**

**specifying in unencrypted form in the content request message, the message type; an identifier of the network-accessible location where the determined route is stored; and a plurality of message receiver elements, wherein a separate one of the message receiver elements is specified for each of the intermediary nodes that is entitled to access each of the security-sensitive portions, the separate one specifying an identification of that intermediary node as a permitted receiver of that security-sensitive portion and a node-specific keyword corresponding to that intermediary node;**

**selectively protecting the security-sensitive portions of the content request message, according to the determined access rights by encrypting, for each of the security-sensitive portions of the content request message, that security-sensitive portion separately for each distinct one of the intermediary nodes which is entitled to access that security-sensitive portion and storing that separately-encrypted security-sensitive portion in the content request message in association with the node-specific keyword corresponding to that distinct one of the intermediary nodes, thereby enabling each of the intermediary\_ nodes to locate and access each of the security-sensitive portions which it is entitled to access and preventing that intermediary node from accessing any of the security-sensitive portions which it is not entitled to access; and**

transmitting the content request message with its selectively-protected portions from the content requester to the content provider on the determined route.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
